Our Public Works Department has hired a new Wastewater Level 2 Operator as a contractor to complete routine maintenance tasks for the wastewater collection system. This includes identifying, inspecting, and documenting all maintenance work related to the systems Air Release Valves, Flush out Points, and Main/Branchline valves. The operator will be exercising (opening and closing) all aforementioned valves regularly, rotating with the other Summer Villages. He will be locating and staking all curbstop valves. Please do NOT remove the stakes. These stakes will assist in winter response times. Tracking and documentation of the maintenance assists in proper infrastructure/asset management practices and will contribute to the longevity of the system lifecycle.

Congratulations!

Congratulations to Our Photo Contest Winners!
