

Norglenwold has been home for our family for 25 yrs. My wife Anne & I have raised our children here. While there maybe a better place for that, its not known to us. We have enjoyed the company of many neighbours who have become friends in our time in this community.

Within the last 17 yrs Anne and I have owned and operated a oil and gas related construction business with all the demands and commitments that includes. I was recently asked if I had any experience in the municipal government arena. To which I answered, “ If one is able to keep 30-40 employees motivated and committed to show up @ 6am 6 days a week, for their benefit , that in its self can take a bit of “political” management.

We as residents of the Summer Village have a great opportunity to enjoy the lake we live at. I have worked with the SLWS & ALMS in spending time on the lake extensively testing and sampling our greatest asset. Because with out the lake, we’re just another group of houses.

Our current landscape is changing, which it needs to. The cottages are coming down and larger homes are going up. This creates some new challenges as well as opportunity. So as a council we need to ensure the decisions we put in place are able to transition with the changing landscape. Not just for our benefit, but for the growth and sustainability of the Summer Village.

I look forward to the challenge of developing and maintaining the standards and policies required to grow the “Community” of the Summer Village of Norglenwold. Your vote on July 8/17 would be appreciated to assist in accomplishing this end.

Have a Great day!!
