Summer Village Administration

Bay 8, 14 Thevenaz Industrial Trail,
Sylvan Lake, AB T4S 2J5

January 25, 2021

Dear Lot Owner,

Reference: Summer Village of Sunbreaker Cove Servicing

After many years of planning, the Summer Village of Sunbreaker Cove expects our municipal wastewater collection system to start construction by May 2021 and be operational by October 2021. The primary purpose of this letter is to gather your lot servicing requirements to provide you with a quote to extend the municipal service stub (1.5" diameter flexible plastic pipe) to connect to your tank this summer. An information document about the collection system for your reference is also being provided with this letter.

Lot owners are encouraged to complete their tie-ins this summer to realize the lowest capital cost. Completing the attached form provides Stantec Consulting Ltd, our engineering consultants, and administration with information to supply a quote to extend the service stub to your current septic/holding tank location this summer using Summer Village contractors.

1. Mark the location of your current sanitary services, any tanks, septic fields, wells and any other relevant structures on the attached aerial photo of your property, and
2. Provide any available detailed information as to locations, designs and references to property lines or special requests as to where you want the service connection located on your property.
3. If you submitted a similar form in 2016, Stantec has retained it and it does not need to be resubmitted. If your property has undergone development or changes since 2016, resubmit this form as soon as possible.

Summer Villages Administration Office

The Summer Village and Stantec are requesting your formal responses by March 1 2021. Responses should be sent to the Summer Village office. By providing your information, the Summer Village will provide you a quote to have our contractors extend the service stub. The information may also impact where service connections are located on the sewer main lines. Your commitment to participate in the benefits of the larger project will need to be made before June 1, 2021 for scheduling purposes.

If you have technical-related questions about the information being requested from lot owners, Stantec would be pleased to respond. Please contact Brad Vander Heyden by cell at (403)-598-3463 or email at brad.vanderheyden@stantec.com.

The Summer Village will be providing a supplementary letter later in the spring with additional information regarding the projected costs and an updated schedule of this project. We understand that you may have questions about this construction, and it's impacts to you and your neighborhood.

Please feel free to reach out to:

The Administration of Summer Villages
